

Ideation Phase Brainstorm & Idea Prioritization Template

Date	04 July 2026
Team ID	
Project Name	Plugging into the Future: An Exploration of Electricity Consumption Patterns
Maximum Marks	4 Marks

Step-1: Team Gathering, Collaboration and Select the Problem Statement

PROBLEM

How might we help energy analysts and policymakers understand how India's electricity consumption changed across states and regions from 2019 to 2020 — including the impact of, and recovery from, the COVID-19 lockdown — through clear Tableau visualizations?

Key rules of brainstorming

- Stay on topic
- Defer judgment
- Go for volume
- Encourage wild ideas
- Listen to others
- If possible, be visual

Step-2: Brainstorm, Idea Listing and Grouping

Brainstorm — ideas addressing the problem statement, organized by theme:

Trend Analysis	Regional Comparison	COVID Recovery Analysis	Visualization Techniques	Dashboard & Story	Data Prep & Integration
Month-by-month national trend line with lockdown period shaded	Side-by-side bar chart comparing NR/SR/ER/WR/NER	Pre / during / post-lockdown segmented view per state	Dual-axis chart comparing two regions directly	Interactive dashboard with state / region / date filters	Clean and validate the CSV before loading into Tableau
Year-over-year (2019 vs 2020) comparison view	Bubble map sized by average state-wise consumption	Recovery-speed ranking of states after lockdown	Filter actions linking the map, bar, and line charts	Guided Tableau Story with 3 points matching the 3 scenarios	Calculated field flagging the lockdown period (Mar–Jun 2020)
Calendar heat map of daily usage across the whole period	Regional ranking table by average daily usage	% change from pre-lockdown baseline, state by state	Color-coded severity scale for the lockdown dip	KPI summary cards (total usage, peak day, recovery %)	Join latitude/longitude fields for geographic mapping

Group Ideas — clustering related sticky notes into themes:

Grouped Theme	Ideas Merged Into This Theme
National Trend Storyline	Monthly trend line with lockdown shading, YoY comparison, calendar heat map
Regional Comparison	Regional bar chart, bubble map, regional ranking table
COVID Recovery Analysis	Pre/during/post segmentation, recovery-speed ranking, % change from baseline
Dashboard & Interactivity	Interactive filters, filter actions, dual-axis comparisons, KPI cards
Guided Story	3-point Tableau Story matching the trend, regional, and recovery scenarios
Data Prep Foundations	CSV cleaning/validation, lockdown-period flag, lat/long join for mapping

Step-3: Idea Prioritization

The team placed each idea on the grid below to determine what is important and feasible, in order to decide what to build first.
