

Project Design Phase-II

Data Flow Diagram & User Stories

Date	04 July 2026
Team ID	
Project Name	Plugging into the Future: An Exploration of Electricity Consumption Patterns
Maximum Marks	4 Marks

Data Flow Diagram — Level 0 (Electricity Consumption Analytics, Tableau)

User Stories

User Type	Functional Requirement (Epic)	User Story Number	User Story / Task	Acceptance Criteria	Priority	Release
Data Analyst	Data Integration	USN-1	As a data analyst, I can connect Tableau to the Consumption.csv file so that I can begin building visualizations.	Data source connects and fields are recognized correctly	High	Sprint-1
	Data Preparation	USN-2	As a data analyst, I can clean and validate the data (remove duplicates, fix state names) in Tableau Prep.	Cleaned extract has no duplicate or inconsistent state entries	High	Sprint-1
		USN-3	As a data analyst, I can create a calculated field flagging the lockdown period (Mar–Jun 2020) so I can segment the analysis.	Lockdown flag correctly labels records within the date range	High	Sprint-1
Policy Analyst	Data Visualization	USN-4	As a policy analyst, I can view a line chart of monthly consumption (2019–2020) so I can see the overall trend shift.	Chart displays monthly trend with lockdown period highlighted	High	Sprint-2
		USN-5	As a policy analyst, I can filter the dashboard by region (NR/SR/ER/WR/NER) so I can compare demand across regions.	Selecting a region updates all linked charts	High	Sprint-2
		USN-6	As a policy analyst, I can view a bubble map of average state-wise consumption so I can see geographic patterns.	Map displays all 33 states sized/colored by usage	Medium	Sprint-2
		USN-7	As a policy analyst, I can view a pre/during/post-lockdown comparison so I can assess recovery speed by state.	Chart segments usage into the three lockdown phases per state	High	Sprint-2
Stakeholder	Story	USN-8	As a stakeholder, I can walk through a guided Tableau Story covering the three scenarios so I understand the findings without a technical background.	Story has 3 points matching the trend, regional, and recovery scenarios	High	Sprint-3
Data Analyst	Publishing	USN-9	As a data analyst, I can publish the finished workbook to Tableau Public/Server so stakeholders can access it via the web.	Published link loads the dashboard and story correctly	Medium	Sprint-3
Stakeholder	Web Integration	USN-10	As a stakeholder, I can interact with dashboard filters (state, region, date range) on the published web view so I can explore the data myself.	Filters work identically on the published web version	Medium	Sprint-3
