Project Name	Plugging into the Future: An Exploration of Electricity Consumption Patterns
Maximum Marks	2 Marks

Problem - Solution Fit Canvas — Electricity Consumption Analytics (Tableau)

Define CS, fit into CC	1. CUSTOMER SEGMENT(S) CS Energy policy analysts & grid planners analyzing 2019-2020 state consumption data; researchers needing to communicate COVID-19 impact to non-technical stakeholders.	6. CUSTOMER CONSTRAINTS CC Limited advanced analytics/BI training, no dedicated BI team access, tight time/budget constraints, heavy reliance on Excel for day-to-day reporting.	5. AVAILABLE SOLUTIONS AS Manual Excel pivot tables & charts; static PDF slide decks; ad-hoc requests to a central data/IT team for custom reports.	Explore AS, differentiate
	2. JOBS-TO-BE-DONE / PROBLEMS J&P Understand the overall consumption trend shift; compare regions; assess how quickly each state recovered after the 2020 lockdown.	9. PROBLEM ROOT CAUSE RC The raw flat CSV of state-date consumption rows has no built-in trend, regional, or lockdown-recovery visualization capability.	7. BEHAVIOUR BE Analysts manually filter and pivot the data in Excel, build static charts for each report, and repeat this work whenever a new question comes up.	
Focus on J&P, understand RC	3. TRIGGERS TR A quarterly policy review; a leadership request for a COVID impact summary; the start of a new fiscal-year planning cycle.	10. YOUR SOLUTION SL An interactive Tableau dashboard and guided story built from the 2019-2020 state consumption dataset, visualizing the national trend shift, regional variation, and the pace of post-lockdown recovery — replacing manual Excel work with one interactive, shareable view.	8.1 ONLINE CH Existing Excel/PDF reports, internal email bulletins, presentation decks shared over email or Teams.	Extract online & offline CH of BE Focus on J&P, tap into BE, understand RC
	4. EMOTIONS: BEFORE / AFTER EM Before: overwhelmed, unsure how to explain the findings. After: confident, articulate, and backed by clear data.		8.2 OFFLINE In-person planning meetings, printed briefing documents, verbal updates in review sessions.	
Identify strong TR & EM
